## Local News

The local Elks are holding their opening dance of the season this Friday.

A. L. Smith, manager of the Crown Lumber Co. reports a large amount of coal being delivered locally.

Don't forget the Board of Trade meeting this Friday at 6:30 o'clock. There will be a roast duck supper, and every one is invited.

On the occasion of her birthday, Sunday last, Mrs. H. G. Williams invited a few friends to supper.

Messrs Frank Smathers and Dace Sage have been busy lately, wiring a number of stores and residences.

Misses Minn Stevenson and Leona Olson were home from Stettler over the week-end.

The four months old baby of Mr. and Mrs. Blake Dowsell which underwent an operation at Camrose, was brought home Tuesday last. Mother and child are staying at the home. Mr. and Mrs. Lewis Olson, her parents.

A Junior Red Cross has been formed at Ripley, which is significant of the interest being taken in connection with the children.

The Trustees of St. Monica's church will meet at the Rectory on Friday, Oct. 5th, at 8 p.m. at which important business will be up for discussion.

The Ripley Ladies' Aid are planning some special programs for the winter months.

Mr. and Mrs. Howard Conway returned home Tuesday after having spent a lovely time at the coast and also with relatives at Alberta Beach.

Mrs. G. B. Eisner received a nasty cut on her hand while opening a bottle of fruit, which accidentally broke.

Mrs. Steele and Mrs. Jones have returned the store building of Mr. C. H. Estell's, and are opening up a lunch counter. Further announcements will appear next week.

Rev. John Orton Rural Dean of Innisfail, and wife were visitors at the home of Rev. G. M. Morgan yesterday.

Mrs. H. Kiesel of Seattle, Wash., sister of Miss Fletcher and brother, Richard of Fort Saskatchewan, visited at the home of Mr. and Mrs. T. Stranek.

Mr. and Mrs. F. Whiting returned on Thursday last from a trip to Winnipeg, where Mr. Whiting attended a meeting of the General Grievance Committee.

Preliminary announcements were made at the church service at Ripley for a special Thanksgiving service which will be taken by Rev. J. Godard of Stettler on October 21, and also a Thanksgiving supper and sale of work on Friday, Oct. 20th, under the auspices of the Ripley Ladies' Aid.

Mr. Harry Cook limped past the Journal office Tuesday afternoon.

A meeting of the Three Hills Presbytery of the United Church of Canada, was held on Wednesday afternoon and evening at Three Hills. The Presbytery includes the following charges: Acme, Carbon, Swallow, Parbeck, Trochu, Three Hills, Louana, Louana, Elnora Delburne, Alix, Mirror and Bashaw. Rev. T. Taylor of Bashaw, Messrs. Harden and Spies of Mirror and Mrs. Price from Alix, were delegates from the northern end of the Presbytery. After the regular business, Rev. W. McNicol M.A. gave a splendid report of the recent General Council at Winnipeg at which he was present.

See Fred Thompson in "Kit Carson at the Grand this Saturday." A thrilling story of life and love in the olden west. Swift and sure pioneer justice meted out to those who covet the law. Crazed Indian riders. Action Suspense. Drama.

Mr. Gordon Lapp will be glad to meet the members of the C.S.E.T. groups in the United Church on Saturday afternoon at 3, also any of the other boys who would like to join. Supper will be provided for the boys at 5 o'clock.

The British government and the C.P.R. have come to an agreement to jointly undertake the erection of 100 homes for the housing of British immigrant families. Two sites have been picked out at Alix, for building. The cottages will be located on farms, the owner of which is required to give a lease of two acres for a number of years.

The local railroad employees are considering the matter of erecting a curling rink at the rear of the shops. With an ample supply of water the project should be very successful, at any rate we would like to see it go through.

The regular Sunday evening service will be held in the United Church on Sunday evening next when Mr. Gordon Lapp of Calgary Provincial secretary for the Boys' Work Board of the Religious Education Council of Alberta will give a talk on the work he is carrying on throughout the province. Everyone is invited to come and hear Mr. Lapp's interesting address. Mr. Lapp will also speak in the Ripley School at 8 o'clock.

An investigation is being made by the Government as to the advisability of stocking Haunted lakes with fish eggs.

The electric light gang have arrived in town, several carloads of poles having been unloaded recently for the hook-up. The arrival of the "juice" is looked forward to with keen anxiety by many who have strained their eyes under the inefficient light of a coal oil lamp.

## Diamond Jubilee Committee Issues Official Commemorative Medal of Beautiful Design

One of the final tasks of the National Diamond Jubilee Committee, which arranged the celebration last year of the Sixtieth Anniversary of Confederation, has been the preparation of an official commemorative medal. The records of 1867 show that the government of Sir John A. Macdonald issued a medal commemorating the confederation of the provinces. This medal, which was designed and struck in England, showed on the obverse the effigy of Queen Victoria and on the reverse a group of five figures symbolizing the founding by Britain of the five original provinces of the pact of confederation. In designing a medal commemorating the Diamond Jubilee, the National Committee desired to show on the obverse an effigy of His Majesty King George V. and on the reverse a single figure which, in some measure represent the spirit of unity and strength which has been developed in Canada during

those of Cook and Vancouver. The medal, which is struck in the Royal Mint from the Canadian coat-of-arms, "A mari usque ad mare." The National Committee is happy to acknowledge the splendid co-operation of the London and Paris mints in the production of the original design of this medal. The dies arrived in Canada early in August and the work of striking the medal is proceeding at the Royal Mint in Ottawa. The medal is three inches in diameter—one of the largest ever handled by the Ottawa Mint. All the metal used is from Canadian sources and the medal is thus a happy combination of British, French and Canadian artistic and technical effort. The committee has ordered gold medals to be struck for His Majesty the King, which for His Excellency the Governor-General of Canada and for the Prime Minister of Canada. Gold medals will also be presented to

## Another Classroom on Wheels Appears

Education in these days is hard put to it to keep pace with civilization although the one is dependent upon the other. In the more remote districts of Canada, in particular, the cause of culture has a struggle to survive and were it not for modern methods the rising generation in many parts would be almost without education. Although agricultural communities enjoy the most modern facilities and the "little red school house" has assumed an increased importance and has considerably en-

Co-operating with the Ontario Department of Education, the Canadian Pacific Railway has evolved the school car, and late this summer issued on its Angus Shops the second and especially prepared coach for this unique purpose. It is now operating in the district in Ontario lying to the west of Port William and Port Arthur, while its predecessor is carrying on its duties as it has for some time past in Northern Ontario in the neighborhood of Carleton and Chapleau. The school car is equipped in every

## Mining Possibilities of Northern Manitoba and Saskatchewan Attracting Great Attention

The year 1928 will undoubtedly be a record one in the history of Canadian mining. The search for mineral deposits has been unequalled both for its intensity and for its breadth of activity. Never in any one year has so much money been spent in exploration as will have been spent this year. The operations are nationwide but by far the most important are those that are directed to areas underlain by the Precambrian rocks of the northern parts of the provinces of Quebec, Ontario, Manitoba, and Saskatchewan, and of the Northwest Territories.

The most spectacular explorations are those that are headed into the most remote parts of the country east and west of Hudson Bay. When it was learned last winter that transportation to Flin Flon was to be provided that that last winter, the country was finally to be explored, and that other large ore-bodies in northern Manitoba had been discovered, the Department of Mines, at Ottawa, was flooded with requests for information regarding that part of the country. The interest broadened and the possibilities of more remote areas were considered. It was felt that the completion of the Hudson Bay Railway to Churchill and the increase of boat transportation on the bay would render accessible a great stretch of country that had hitherto been regarded as Canada's hinterland. Then came the desire to be on the ground early and secure the best. The result is that a great many prospecting parties have left for these northern areas. The exploratory work is entrusted to hardy men of experience and knowledge. Some prospectors have gone to Hudson Bay by way of northern Ontario and northern Manitoba, others have left by boat from points on the Atlantic coast. One company alone has sent by boat ten parties of two men each and the necessary equipment and supplies are loaded and directed by men sent by aeroplane.

In the more readily accessible areas and in areas where transportation facilities are of the best, search for more mineral deposits is being carried on with feverish intensity. This takes the form of surface prospecting and of underground testing by diamond drilling, shaft sinking, and drifting. All this exploratory work has been given a powerful impetus by the discoveries entering on the northern part of the Manitoba-Saskatchewan border in the Flin Flon area of western Quebec, and the Sudbury, Patricia, and other areas of Ontario, and it is expected that by the close of the year a very important addition will be made to the known and developed mineral reserves of the country.

To Study Ancient Designs  
The National Museum, Ottawa, will conduct a study of the ancient handicrafts and designs of French Canada, in order to determine the extent of their influence on the arts and crafts of the various Indian tribes. It is thought that many, if not most of the patterns in hand silk work that appear on Indian specimens may not be aboriginal at all but copied from European patterns.

Tourists Aid Development  
The tourist is often the force-motivator of the homemaker and investor. He visits the country and comes with his own eyes the character of its people and resources, and if he later returns to sell or to invest in the land, he does both in a more satisfactory manner.

That young Canadian sprinter from the West coast astonished the world. To beat the West in anything a fellow has to be speedy.

"The drunken driver must go," says a newspaper heading. That's just the trouble. He always does go.

Young Lady: "Your novel has a charming ending."  
What do you think of the opening chapters?

"I have got not to them yet,"—Lustige Koller Zeitung, Cologne.

Parisian Simplicity

A slender one-piece dress achieves distinction through shirring, which gives a slightly flaring appearance at shoulders, and forms pockets at each side of front of skirt and adds flare to hemline. It is a youthful type that is becoming to most figures, and so entirely wearable and smart in metropolitan costume. Wool, crepe, satin, cotton, crepe, georgette, crepe, and sheer velvet, also adaptable. Style No. 259 is designed in sizes 16, 18 and 20 years, 36, 38, 40 and 42 inches bust. Pattern price 25 cents in stamps or cash is available.

How To Order Patterns  
Address: Winnipeg Newspaper Union, 175 McBurney Ave., Winnipeg  
Pattern No. .... Size .....

Postman: "As soon as I saw you come round the bend I said to myself, 'Forty-five at least.'"  
Lady Driver: "How dare you! It's this hat that ages me."

Nine in a Line

The distinction of being the point in the British Empire from which the largest number of bushels of grain are shipped direct from farm to rolling way. Here is a view of the local view of the bushels of grain, and indications are that it will exceed its own record this year.

the last sixty years. A number of letters in working out its idea and a Canadian artist assisted the design of Mr. C. W. Jefferys of Toronto was finally adopted as expressing most accurately the views of the committee. The general idea was given by the design of the Canadian flag translated in its own original way into medallion art by the eminent sculptor and engraver, Mr. Haywood, of Paris, France. Miniatures of the medal reproduced beneath show a new effigy of His Majesty King George V., which is the work of one of the foremost British artists Sir Robert Macdonald. The reverse shows a figure which admirably typifies the qualities of youth, energy and confidence in the future. By its position, facing the Atlantic, from which comes a strong invigorating breeze, there is a suggestion of the cultural origin of our people and of the ideals of liberty and justice inherited from overseas. The figure stands on a pedestal bearing the dates 1867-1927. Surrounding the pedestal are sheaves of wheat and wreaths of maple leaves and in the background a map of Canada, in the upper part of which the shield from the Canadian coat-of-arms appears. On the Atlantic side of the map are the names of the first discoverers, Cartier and Champlain, and on the Pacific side

H.H.H. the Prince of Wales and the Rt. Hon. Stanley Baldwin, Prime Minister of Great Britain, who paid a special visit to Canada in connection with the Jubilee ceremonies last year. A gold medal will also be deposited in the Dominion Archives. The medals for the King, the Governor-General and for H.H.H. the Prince of Wales, who accompanied the Prince of Wales on his visit last year, members of the Privy Council of the province and the Prime Ministers of the provinces. Bronze medals will be presented to senators and members of the House of Commons, to members of the provincial governments, to the surviving sons and daughters of the Fathers of Confederation, to members of the National Diamond Jubilee Committee and to officers of the Provincial Diamond Jubilee Committees. The medals are being struck as rapidly as possible at the Royal Mint and it is hoped that the distribution will be completed before the end of the present year. The Rt. Hon. W. L. Mackenzie King, Prime Minister of Canada, took passage of a ship to Europe in connection with the signing of the Kellogg treaty to prevent global hostilities. His Majesty the King, H.H.H. the Prince of Wales and the Rt. Hon. Stanley Baldwin.

larged its scope, other districts suffer by necessity from neglect. Outlying parts with a scattered population find late communication at best in summer time under the most favorable conditions difficult enough, but when winter closes down a paralytic is brought about. Such facilities could not afford school facilities nor could permanent schools adequately serve the community. During the winter season children could not travel with safety. This problem, which for a number of years remained unsolved, has been met at last by a singularly practical and effective remedy, the "school car."

Permanent Link With World  
Residents of Pitcairn Island to Receive Radio Transferring Set  
Isolated since birth, except when some friendly or storm-buffed vessel comes to visit them, the islanders of the little Pitcairn Islands will soon be able to talk with the world for a Marconi wireless transmitter has been presented to the islanders by the Marconi International Marine Communication Company, Inc. on its way out there and, when installed, will be a permanent link with the outside world.

Pitcairn Islands lies in the mid-Pacific Ocean. The island is sighted by many sailing ships in the old days. Unlike the majority of islands in this region it is without corals, but rises abruptly from deep and rugged cliffs of basaltic lava. Recently a small group of islanders, headed by the Marconi Company, picked it up from boats that had been thrown by the Marconi operators on the ships that called at the island. In fact they obtained a single crystal set and five years later received a Marconi type 31 ship's crystal receiving set, but on each they can only receive.

British Settlers For B.C.  
Block System Of Settlement Is Advocated By Premier  
Premier S. F. Tolmie informed the Empire Parliamentary Association delegates and members of the Vancouver board of trade that the provincial government was prepared at any time to consider regulations for the placing of British home settlers on British Columbia lands. British Columbia was prepared to supply the land, administration, supervision, schools, roads, and their investment in railways. Hon. Dr. Tolmie stated.

The block system of settlement was advocated by the premier and he believed preliminary training could be given settlers in clearing settlement lands. During the conference the feasibility of settlers going on the land in the Peace River district was discussed, but the settlement scheme embraced various sections of British Columbia.

Brandon's Broadcasting Station has just gone into daily use, and a studio will give grain and stock reports each day, and once a week, the evening broadcast local concert programmes.

The main supply of rubber comes from hevea trees of the tropics.

## Manitoba Fisheries

Organization Meeting Held To Place Industry On A Firm Footing  
At a meeting of the Manitoba Co-operative Fisheries Limited, attended by more than 100 representative fishermen from Lakes Winnipeg, Manitoba and Winnipegosis, plans were completed to place the industry on a basis where the industry would share to a greater extent in profits made in the business. Suggestions were made to appoint agents at Fargo and New York. Last year Manitoba produced 18,000,000 pounds of fish and those who belonged to the organization were responsible for a catch of about 7,000,000 pounds.

Among the various regional parts belonging to units of the British Army at different times have been a cheetah, an ape, a lion, a seal, a chimpanzee, a black bear, and a lamb.

"I read your remarkable article. In fact, I read it three times." "You flatter me."

"Not at all. From now I don't understand it."—Pete Mole, Paris.

W. N. U. 1733

## Distinguished Farmers

What Pool Includes Amongst Its Members A Prince, Baron, Duke And Countess  
The Alberta Wheat Pool now includes among its members a prince, a baron, a duke and a countess. They have between them a signed-up acreage of 10,000 acres, in which at the office of the pool in Calgary.

These distinguished members are His Royal Highness the Prince of Wales, Baron Rofsey, the Duke of Sutherland, and the Countess de Farnham. The latter, who has a farm at High River, has just signed up a contract for 200 acres with the pool.

## Human Power Plant

Psychologists Claim To Have Heard Messages From Nerves In Body  
Human life has been revealed as a wonderful electric power plant and system of transmission lines. Experiments in psychology say they have listened to messages flashed over the network of nerves in the human body, translating the impulses of nerve currents into sound waves that human ears can hear. Impulses are detected by electrodes attached to the body. These nerve messages, magnified eight hundred times by a powerful amplifier, can be broadcast by wireless.

## Valley Of A Thousand Falls

The name, Valley of a Thousand Falls, the Mount Robson District, British Columbia, was bestowed by the Rev. G. B. Kinney, who first visited the region with Dr. A. P. Coleman and participated in his attempt to climb Mount Robson.

## New Radio Test Successful

Ground-To-Air Communication Has  
Been Proved Practicable

Ground-to-air radio communication has already been shown to be practicable by the Royal Canadian Corps of Signals, which point to the possibility of establishing meteorological services to planes in flight as suggested in the recommendations of the court of enquiry into the disappearance of the Vancouver-Seattle trans-mountain plane recently, according to announcement by J. G. Desbarats, deputy minister of national defence.

Mr. Desbarats pointed out that the already radio communication had been established between a standard transmitting station at Ottawa and a plane flying between the capital and Montreal, a distance of over a hundred miles, and results have been so successful that the engineers of the signals corps are led to believe that such communication could readily be placed on a practical working basis.

In this way radio communication can be established over an entire route with stations at 250-mile intervals, or at closer intervals, depending on varying local conditions.

Establishment of such a system would mean that a pilot flying over a route would be supplied with complete information regarding changes in weather which were occurring along the line of his flight and would be in a position to make prompt decisions as to the necessity and safety of the plane, its passengers and cargo.

## Good Roads Necessary

One Thing Country Cannot Afford  
To Do Without

The world is now moving on wheels and a province that does not provide the facilities for allowing the wheels to turn will be left far behind in the march of progress. The roads that will have to be built in Western Canada to keep these provinces anywhere in line with the states will permit free flow of traffic in all kinds of weather are as essential to the business of the prairie community as telephones, telegraphs and railways.

It is estimated that the average cost of running an auto is \$229 a year, of which \$101 goes for gasoline and oil.

Not: "Marriage takes all the poetry out of a fellow."

Edith: "Is that so? Then it can't be a failure."

Forest fires in the United States cost nearly \$100,000 a day.

It May Be  
Urgent

Chinese Newspapers Censured  
Figures So People Would Work

The temperature was censured in Hankow recently. A hot spell caused a newspaper controversy over the heights attained by the mercury, and the charge was made that the figures were deliberately decreased.

Each day the weather apparently had been getting hotter, and each day the public seemed to grow more sure in the newspapers, only to find just one or two points below 100.

A reporter was sent to investigate and the Chinese authority informed him: "If we put the figure at more than 100 the public will think it is too hot and not work so hard."

This was duly published. The next day the aggrieved authority refused to give out any figure on temperature or water usage, not for a day the public had to depend upon their own thermometers. However, an outcry in the public press forced the editor to be suspended after one day.

Farmers Rebel Against Soviets  
Growing tension between farmers and the Soviet authorities, mainly in consequence of the requisitioning of grain, is reported by people arriving from the Ukraine, South Russia. Dissatisfaction has resulted in open insurrection. Soviet houses have been set on fire and Soviet agents roughly handled.

"How's your wife coming along with her driving?"  
"She took a turn for the worse last week."

W. S. U. 1703

"RED ROSE TEA"  
Reduced in Price

Lower Markets for good medium quality teas enable us to reduce the price of GREEN LABEL Red Rose Tea from 80c. to 75c. per lb. package, and to 38c. for the ½ lb.

The new prices will apply on stocks now on hand in the stores, as arranged with all the merchants who sell Red Rose Tea.

But due to an increasing demand the world over, the markets for extra fine quality teas, such as RED ROSE ORANGE PEKOE, are higher rather than lower—so we regret we cannot make any reduction in this grade at present.

RED ROSE TEA is put up only in Clean, Bright Aluminum Packages. The very best container for good quality tea.

## T. H. ESTABROOKS CO., Limited, Winnipeg

What most people call indigestion is actually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude boric acid. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless or efficient.

## Wealth of the West

Eastern Financial Men Hear About  
The Wonderful Possibilities of  
Prairie Provinces

The Toronto Globe is much impressed by Hon. George Spence's recent address before the Dominion Mortgage and Investments Association here on the subject of Saskatchewan's resources. This address by Saskatchewan's Minister of Railways, Labor, and Industries, must have been an eye-opener to the visitors, in view of the Toronto paper, which continues in part as follows:

Farms will remain the greatest source of wealth for the Province perhaps for a long time according to Mr. Spence. He noted that the top six inches of soil on the 70,000,000 acres of agricultural land in the Province produce annual wealth of over \$100,000,000 from field crops, livestock and other farm products. "The peak of the curve in the production of this great food factory is nowhere in sight," he added, "and it is all the more remarkable when we reflect that there is no limitation in the tremendous accumulation of nitrogenous matter, with its associated mineral constituents, which comprises its productive and responsive soil."

There are large deposits of lignite rock, but owing to its quick glaciation in the air it is best made use of by a process of briquetting. Clay deposits are extensive, and suited for many purposes in porcelain, glass and other articles of commerce. It is apparent, however, that Canada's population and climate are not advancing fast enough to use properly the clay deposits of Ontario and Saskatchewan. There are important deposits of tar sands, sodium sulphate, volcanic ash and other odd resources which some day may find a market.

Southern Saskatchewan is rich in minerals, containing, for example, an extension of the Flin Flin copper area of Northwestern Manitoba. The Pre-Cambrian shield which has revealed such extensive mineral wealth in the Eastern Provinces, cuts across Saskatchewan, and leads to high hope for development in the future.

Associated with the mineral wealth in the wealth in water power, and Mr. Spence pointed out that the Dominion Government estimates a possible development of 1,000,000 h.p. on the Churchill River and its tributaries, or more than double the requirements of all the mines now in operation in the Dominion. The North is also rich in furs, wool and fish, making altogether a Province whose diversification will yet surprise a country which becomes hardened to its production of surplus in natural wealth.

Not only, as the Toronto Globe says, must Hon. Mr. Spence's address have been an eye-opener to the men-

One tasteless spoonful in water neutralizes many times its volume in acids. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude way. Do learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

## Machine For Writing Music

Frenchman's New Invention Has  
Twelve Letters and a Set Of  
Figures

Will symphonies and sonatas of the future, not to mention blues and ragtime, be written on a typewriter? Whether or not many people of this province, as we have remarked before, it was a comprehensive and able portrayal of the vast natural wealth of Saskatchewan. It was a revelation of the extent and diversity of our resources.—Hegins Leader.

## Machine For Writing Music

Frenchman's New Invention Has  
Twelve Letters and a Set Of  
Figures

Will symphonies and sonatas of the future, not to mention blues and ragtime, be written on a typewriter? Whether or not many people of this province, as we have remarked before, it was a comprehensive and able portrayal of the vast natural wealth of Saskatchewan. It was a revelation of the extent and diversity of our resources.—Hegins Leader.

In announcing his invention to the world, M. Bonnard says that he expects to hear much criticism and disapproval, but holds himself at the disposal of all enquirers. In addition to being a lawyer, M. Bonnard also holds the degree of Doctor of Philosophy.

He throws doubt on the usefulness of his invention by the statement that the widespread use of his typewriter would lead to the production of much more music, apparently placing emphasis on quantity rather than quality. But, he argues, the same can be said to the effect of the ordinary typewriter on the production of literature.

## Censured The Temperature

Chinese Newspapers Censured  
Figures So People Would Work

The temperature was censured in Hankow recently. A hot spell caused a newspaper controversy over the heights attained by the mercury, and the charge was made that the figures were deliberately decreased.

Each day the weather apparently had been getting hotter, and each day the public seemed to grow more sure in the newspapers, only to find just one or two points below 100.

A reporter was sent to investigate and the Chinese authority informed him: "If we put the figure at more than 100 the public will think it is too hot and not work so hard."

Farmers Rebel Against Soviets  
Growing tension between farmers and the Soviet authorities, mainly in consequence of the requisitioning of grain, is reported by people arriving from the Ukraine, South Russia. Dissatisfaction has resulted in open insurrection. Soviet houses have been set on fire and Soviet agents roughly handled.

"How's your wife coming along with her driving?"  
"She took a turn for the worse last week."

W. S. U. 1703

New Camera Loaned To Byrd  
Invention Of Naval Officer Simplifies  
Map Making From Air

A new kind of camera, which will record in a small snap shot pictures of its own position on the earth's surface, has been perfected at Rochester for the United States Navy. It was loaned on August 2 to Commander Byrd, for use during his Antarctic expeditions.

The camera is the idea of Commander M. B. Pierce, of the U.S. Naval Air Station at Lakehurst, N.J., who collaborated with the Eastman Kodak Company in perfecting and building it. Commander Pierce loaned it to Byrd. Its name is the Byrd sextant camera.

A very important possibility of this camera is that it will permit free flow of traffic in all kinds of weather are as essential to the business of the prairie community as telephones, telegraphs and railways.

It is estimated that the average cost of running an auto is \$229 a year, of which \$101 goes for gasoline and oil.

Not: "Marriage takes all the poetry out of a fellow."

Edith: "Is that so? Then it can't be a failure."

Loeb And Leopold Eligible For  
Parole In Six More Years

An error in mittimus under which Richard Loeb and Nathan Leopold, Jr. were sent to the Joliet penitentiary four years ago makes these two slayers of little Billy Franks eligible for parole in six more years.

Hinton Clabaugh, chairman of the state board of pardons and paroles, has stated.

These men, "each under life sentences for kidnapping, are building up 'fine records,' Clabaugh said, with a view to seeking parole when, because of the error in the mittimus, they become eligible within six years."

"One is private secretary to the first warden," Clabaugh said, "while the other is private secretary to the Protestant chaplain. Yet Leopold is generally believed to have been the brains of the prison outbreak a few months ago which has cost so far several innocent lives and resulted in the hanging of three men."

He: "You know, dear, we have had our own home just 12 months."

She: "Gracious! And it seems like a year."

Chinese Newspapers Censured  
Figures So People Would Work

The temperature was censured in Hankow recently. A hot spell caused a newspaper controversy over the heights attained by the mercury, and the charge was made that the figures were deliberately decreased.

Each day the weather apparently had been getting hotter, and each day the public seemed to grow more sure in the newspapers, only to find just one or two points below 100.

A reporter was sent to investigate and the Chinese authority informed him: "If we put the figure at more than 100 the public will think it is too hot and not work so hard."

This was duly published. The next day the aggrieved authority refused to give out any figure on temperature or water usage, not for a day the public had to depend upon their own thermometers. However, an outcry in the public press forced the editor to be suspended after one day.

Farmers Rebel Against Soviets  
Growing tension between farmers and the Soviet authorities, mainly in consequence of the requisitioning of grain, is reported by people arriving from the Ukraine, South Russia. Dissatisfaction has resulted in open insurrection. Soviet houses have been set on fire and Soviet agents roughly handled.

"How's your wife coming along with her driving?"  
"She took a turn for the worse last week."

W. S. U. 1703

## Little Helps For This Week

"Lord, teach us to pray!"—Luke 11.1.  
O Thou by whom we come to God. The life, the truth, the way! The path of prayer Thyself hadst laid. Lord, teach us how to pray.

Wherever there is religion there is prayer, and wherever there is a religious soul there is heard the language of prayer.

Three minutes, unduly prayer. Prayer mayna bring money, but it brings us what no money can buy—a power to keep from sin, and to be content with God's will, whatever it may please to send.—George Eliot.

## Exercise

You need a cool and soothing liniment after a run with Minard's Liniment.

MINARD'S

## PROVINCES WILL CLAIM RIGHTS TO WATER POWER

Ottawa.—Dominion and provincial rights to water powers will be argued at the supreme court of Canada next week. Recognized as one of the most important questions with far-reaching ramifications which have come before the courts in years, the matter undoubtedly will be carried to the Privy Council in England for final adjudication.

Development of the potential water powers of the St. Lawrence International and interprovincial in character, development of water power on the Ottawa river and a number of other power projects, all these are vitally concerned in the points to be decided respecting Federal and provincial jurisdiction. The case probably will extend over two weeks.

The Dominion government and at least five of the provinces, Ontario, Quebec, Manitoba, Saskatchewan and British Columbia, will be represented.

Ontario and Quebec, through counsel, take the leading part in opposition and will be supported by British Columbia, Manitoba and Saskatchewan probably also will be heard in argument in answer to the claim of the Dominion.

These provinces, broadly speaking, who contend that the water powers were vested in the provinces before confederation and were not transferred to Dominion Domain by virtue of the British North America Act. A further argument would put forward on behalf of the provinces that the Dominion has no right to water powers and that any treaty respecting an international waterway must subordinate to the British North America Act.

Saskatchewan has its own legal representative at Ottawa who has already received instructions to appear at the Supreme Court hearings and watch Saskatchewan's interests.

## Withdrawing From League Of Nations

Argentine Parliament Is Discouraging Appropriations To Meet Debt. Geneva.—Argentina intends to withdraw from the League of Nations. This was indicated by a decision from Buenos Aires stating that the Argentine parliament had decided to discontinue appropriations to meet league dues.

The news caused surprise and consternation in league circles. It was pointed out that the Argentine action is tantamount to withdrawal as no nation may remain a member of the league unless the financial obligations are met. Under the terms of the league any member nation that contemplates withdrawal must pay dues for two years after notification of withdrawal is given.

## Canada Helps Storm Victims

Ottawa.—Hon. Ernest Lapointe, acting prime minister, announced that the government of Canada is subscribing the sum of \$25,000 to the British West India hurricane relief committee. Mr. Lapointe stated that the step was taken after consultation with and upon the recommendation of the Canadian Red Cross.

## May Appeal To Privy Council

Ottawa.—Permission to carry their appeal to the Privy Council in England will probably be granted to the Proprietary Airline Traffic Association, founded by the department of labor to be an association in restraint of labor. The matter, it is stated, is now before the department of justice.

## Chinese Soldiers Face Starvation

Amoy, China.—Generals of the Nationalist army notified Nanking headquarters that 100,000 soldiers are in danger of starving to death in the Chihli vicinity. The message also said the villagers were suffering from lack of food and soldiers were not provided with boots or blankets.

## Fighting In China

Teking.—More than 2,000 Chihli-Batung soldiers have been killed opposing the Nationalists northeast of Tien Tsin, says the Kueilin news service, reporting the surrender of the former Northern army.

## Air Mail Service Starts

Toronto.—Daily air mail service between Montreal and Toronto, and an international service between Montreal and Albany, N.Y., started October 1.

W. N. U. 1753

## Does Not Need Warships

Fleet, Says General Smuts

Capetown, South Africa.—Speaking to an audience which was predominantly of Dutch origin, General Jan Christian Smuts, leader of the opposition in the assembly, was vigorously applauded in a memorable speech on the secession question.

General Smuts at one point declared: "If we were not within the empire we would have to go to America or France, or some other big country to protect us because we are not safe. One warship could bring us to our knees. But today we are not considered in a kral. We are in a friendly circle with a powerful British fleet to help us in any injustice is planned toward us."

"We need not spend millions on a fleet," General Smuts continued, "but can concentrate on projects of development so necessary to a young country. I am not a bondholder, but I am a young man."

## Cement Firms Protest

Producers Will Contest Move For Removal Of Duty

Ottawa.—Contesting the application of the Canadian Council of Agriculture for removal of the import duty on cement, representatives of the cement producers in Canada continued today their protests relating to the industry before the tariff advisory board.

In the brief of the Canadian Council of Agriculture, which was filed recently, it was claimed that the prosperous condition of the industry had led to the continuation of the existing import duties. In opposing the case for the producers generally, Professor J. Jackson, Toronto, categorically denied the claims of the applicants. He sought to prove that the cost of production had risen 57.5 per cent since 1913, and that the industry was unable to provide overhead and profit, as maintained in the brief of the council of agriculture.

## Will Make Second Attempt Next Year

American Pilot Stranded On Flight To Stockholm Via Greenland

Copenhagen.—Hert Hassell, American flyer, who arrived here from Greenland with his trans-Atlantic companion, Parker Cramer, announced he would make another attempt next year to fly from the U.S. to Stockholm by way of Greenland. Hassell and Cramer, who were rescued in Greenland after having been lost with his trans-Atlantic expedition, which had brought them to safety.

## Canada Will Be Represented

Ottawa.—Canada will be represented at the International Air Conference, which takes place in Washington in December. This was stated officially by the Department of Transport. Canada's representative has not yet been selected, but an announcement with respect to the selection will be made later.

## Zeppelin To Start October 10

London.—Germany's new trans-Atlantic dirigible, Count Zeppelin, will start its first flight to America not later than the Arctic wastes, an Exchange Telegraph despatch from Berlin. The generally favorable weather predicted for the trans-Atlantic during the first two weeks of October makes a start at that time almost certain, the despatch said.

## B.C. Cabinet Unopposed

Vancouver.—The nine portfolio holders members of the British Columbia cabinet, headed by Hon. Dr. S. P. Meine, premier and minister of railways, were re-elected to the provincial legislature when they were unopposed at nomination proceedings. Voting was to have taken place on October 4, if there had been contests.

## Swedish Government Resigns

Stockholm.—The government of Sweden, headed by Premier Ekman, leader of the central bloc, resigned as an outcome of the recent election in which the government party lost several seats including that of Foreign Minister Loefgren.

## Mayor Of Cardston Dead

Lethbridge.—Mayor Mark Spencer, Cardston, pioneer and eight times a National legislator of that town, died recently at Rochester, Minn.

## Will Analyze Frosted Wheat

Scientists At University of Saskatchewan Have Started Work

Saskatoon.—Now that four Canadian scientific laboratories, including that of the University of Saskatchewan, have determined that milling and baking qualities are vitiated by toughening or dampening of grain, scientists here, in collaboration with the investigations carried on elsewhere in Canada, are turning their attention chiefly to frosted wheat.

With painstaking effort as to detail, the Saskatchewan University laboratory, under general supervision of Dr. T. Thorvaldsen, professor of chemistry, and direct supervision of Dr. R. K. Larimer, has begun work on the object of determining the damage done by frost to the milling and baking quality of wheat.

## FEDERAL AID FOR HIGHWAYS SHOULD CONTINUE

Regina.—That federal aid for highways should be continued with additional aid to the various provinces was the view of the delegates attending the 11th annual convention of the Canadian Road Builders' Association who dealt with many other matters of interest during the sessions here. Elimination of level crossings, building concrete bridges and roads, the financial responsibility of urban municipalities in road development, gasoline taxes and winter roads all had their place on the agenda.

Hon. O. L. McPherson, minister of public works for Alberta, was unanimously chosen president of the association and other officers were elected. Seven invitations were presented for next year's meeting place and while no decision was arrived at Prince Edward Island would seem to be in the lead.

When the subject of Federal aid for highways was under review the discussions arising from this topic were crystallized in the following resolution:

"Resolved, that in view of the very marked and acknowledged need which comes to Canada as a whole because of the large investments made in the highway construction and maintenance by various municipal and provincial bodies, such benefit being of a far reaching nature and affecting many branches of Dominion government service; and whereas the Federal government has been and is continuing to be directly or indirectly traced to highways; and in view of the fact that the Federal government has been expected, and in view of the increase in highway travel throughout Canada, this association, in annual convention assembled, reaffirms its oft-stated belief in Federal aid to highways and that additional aid should be granted at the earliest possible moment; the Department of Transport and the executive committee are hereby instructed to make every reasonable effort to have this resolution made effective."

## Director of Cancer Research

Dr. E. H. McDonald, shown above

Dr. E. H. McDonald, shown above, who believes that he can forestall cancer by treating the subject through the administration of thyroid gland extract and other means. Dr. McDonald is director of cancer research at the University of Pennsylvania and the Philadelphia General Hospital. Dr. McDonald is a Canadian who has his early education in Winnipeg and finished it in Toronto. He has three brothers, Brig-Gen. H. P. McDonald, C.M.G., D.S.O., of Winnipeg; Dr. H. McDonald, M.P.P., of Qu'Appelle, Sask., and F. A. McDonald, Winnipeg.

## Attending University Of British Columbia

Percy Williams Will Take Freshman's Course In Vancouver. Vancouver.—Percy Williams, Olympic 100 and 200 metre champion, will attend the University of British Columbia here for one year. After that he will take the business administration course at the University of Washington. This was decided at a meeting of members of the committee in charge of Williams' affairs here, which Williams attended.

Williams spent two days in Seattle and returned home in order to be in all aspects of his situation with his friends here. He had been invited to attend the Washington institution.

"It is remaining in Vancouver for the year because he feels that it would be unfair to those who welcomed him so wonderfully and who have been so good to him to leave," a member of the committee said.

## Expresses Sympathy For Florida Sufferers

King George Cabled Condolences To President Coolidge

London.—That King George takes a keen interest in world affairs is evidenced by the cable sent by him to President Coolidge, expressing his sympathy to the people of the U.S. for the sufferers in the Florida hurricane.

The message read: "I desire to express to you and through you to all Americans my sincere condolences upon the disaster which has recently overwhelmed Florida. The Virgin Islands and the state of Florida as a result of the recent hurricane and my sympathy with all those that have suffered from its effects."

## Anglo-French Naval Pact

United States Government Rejects Agreement In Note Sent To Both Powers

Washington, Sept. 26.—An unqualified rejection of the so-called secret Anglo-French naval accord as a basis for renewed discussions on naval armament limitations is understood to be contained in the United States replies to Great Britain and France which were forwarded to Paris and London.

A separate note for each government was sent the American embassies for transmittal to the foreign offices. It had been expected one note would be sent to both governments. Although it was learned the notes are not identical in form they are understood to be similar to each other in their essential facts.

It is understood both action must be taken in a lengthy discussion of the American stand on naval disarmament with respect to cruisers and submarines. This subject has been the centre of disagreement between the United States and Great Britain and is held to have caused the failure of the 1927 Geneva conference.

As indicated at the White House it is expected the note will reiterate the United States stand on naval disarmament as outlined at the 1927 Geneva conference.

## Entertaining Premier King

Entire British Cabinet Invited To Dinner At Savoy Hotel

London.—Premier Stanley Baldwin and the whole cabinet have been invited to the dinner to be tendered to Premier Mackenzie King by Canada by the Canada Club on October 10. This will be Mr. King's only speaking engagement in England. He will spend only one week in England and during that time is in hope of getting about to see the country.

Mr. P. C. Larkin, Canadian High Commissioner, will preside at the dinner, which will be held at the Savoy hotel.

## Forty Killed By Explosion

Powder Magazine In Old Spanish Fort Caused Accident

Matilla, Morocco.—By an explosion at the powder magazine for the ancient Spanish fort of Cebrizorbas 40 persons were killed and 200 injured. The explosion occurred on the night of the 25th.

The explosion demolished the old citadel, on a rocky hill overlooking the town. All houses around the citadel were destroyed.

Women and children were among the dead and injured. Nine soldiers and five Spanish garrison at the fort were killed. The government reported 25,000 persons (\$4,120) in relief of the families of victims.

## CAMPAIGN IS ON FOR ELECTIONS IN GREAT BRITAIN

Yarmouth, Eng.—The first open move in a nation-wide campaign for the forthcoming British general election, when Prime Minister Stanley Baldwin and his government appeal to the British voters for another five-year mandate, will be made here when 2,600 Conservative delegates, a record gathering of its kind, go into conference to hammer out a party platform.

Within a month from now Conservatives, Liberals and Labor, by means of their annual conferences, will determine the issues upon which they will wage the biggest party struggle in this country since the Great War.

The most intense fights are expected on tariff questions, the extension of protective measures by means of "safeguarding" of industries by special import duties.

Close watch is kept on the rapid development of wireless and talking movies. "Talkies" are being made of D. H. Lawrence and other political leaders, motor cars and trucks with the latest broadcasting apparatus made ready for swift campaigns through the country.

The party songs are on, and again the Conservatives are in the lead with song sheets already bound.

One city delicately alludes to the "flapper" vote, that uncertain bloc of five million newly-enfranchised women whose proper behavior is angling, all claiming flapper support, and none too certain of it.

## MAKING EVERY EFFORT TO BRING BRITISHERS HERE

Windsor.—That there was no foundation for the charge made by Bishop Lloyd of Saskatchewan at a luncheon here "that there has been and is today a deliberate attempt to keep the British out of Canada," was the declaration made by Hon. Robert Forke, minister of immigration.

Speaking over the long distance telephone from his farm at Pipestone, Minn., Mr. Forke said: "We are doing every thing possible to bring to Canada Britishers whom we think are willing and capable of working on Canadian farms on a matter what district they come from."

"We are paying, with the help of the British Government and the railways, their passage to their Canadian destination; we are giving them this money so that their start will not be unduly heavy. So many difficulties encountered by the earlier pioneers and those who today are struggling in from non-British countries."

"We are associating ourselves with every good organization, having the British people's best interest at heart, to advance the settlement of British in Canada, and we are doing nothing for means of any other nationality who are coming into Canada."

"What else should we do or can we do in all practical circumstances that we are not now doing?"

## Manitoba Resources

Justice Targoon Appointed Chairman Of Commission To Deal With Question

Ottawa.—Mr. Justice Targoon, of Saskatchewan Government, has been appointed chairman of the commission appointed to inquire into and decide upon the various matters in connection with the Manitoba resources of her natural resources, is in the capital arranging for the organization of the commission.

Mr. Justice Targoon's colleagues on the commission are C. M. Bowman, of London, Ont., and Hon. T. C. O'Brien, of Winnipeg.

Reports to the commission will be made in a few days, and Mr. Targoon, and thereupon an organization meeting will be held, probably in Ottawa.

## Gale Receipts Over Expenses

Montreal.—Quite contrary to all expectations and estimates, the Olympic committee at Amsterdam, in the Netherlands, has announced that the receipts from the sale of tickets for the Olympic games will be in excess of the expenses. This was learned in an announcement made by the Netherlands committee. Official figures are lacking, but it is understood that gale receipts will pay for the expenses of the Dutch Olympic committee by the government and individual subscription.

## Decline In Unemployment

Stockholm.—Unemployment is on a steady decline in Sweden. Latest figures show that the number of people out of work who applied for aid in July was 9,000 as compared to 11,000 in June, a decrease of about 11.9 per cent.

## Support For Gov. Smith

New York.—Representative Mary T. Morton, Democrat, New Jersey, in an address broadcast from here, appealed to women to vote for Governor Smith at the coming election. "The greatest humanitarianism this country has ever produced."

## Rain Produces Ontario Crops

Sault Ste. Marie, Ont.—Heavy rains and continued cold weather are alarming farmers in this district. Scores of acres of grain are said to be rotting in the fields, and potatoes are being ruined by excessive moisture.

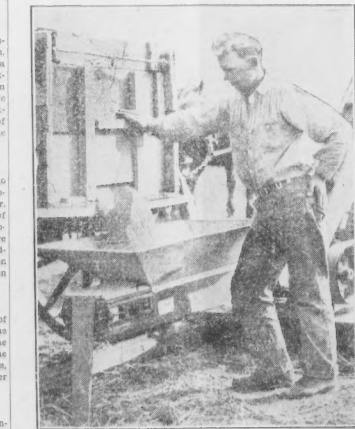

## Exhibit Of Canadian Fruit

Winnipeg, Man.—Choice Canadian fruit for English exhibition and display passed through Montreal on the way to Manchester and London, being conveyed with special precautions by the Canadian National Express Company.

## Enters New Era

Detroit.—A plan that he was walking in the country with his dog and killed his wife, Amelia, has been entered as a defense for Chester Kutluk, 48, on trial here charged with murder.

## France Is the only European country whose people's birth-rate shows an improvement on the pre-war figure.

# C.G.I.T. NOTES

The Rainbow group had a  
physical evening in the base-  
ment of the United church on  
Tuesday, Sept. 27. The meet-  
ing was opened with a jolly  
sing-song. A committee of  
three girls were appointed to  
look after the program for  
next meeting. Elsie McKenzie  
was appointed press reporter  
and Ruth Jewell door-keeper.  
At the close of the business  
meeting the girls adjourned to  
the furnace room for physical  
jerks, which soon consumed  
the strength of the participants  
although Elma Muller and  
Peggy Louis seemed to show  
untiring skill in the heel and  
toe squat.

Mr and Mrs Ebert of Loyd-  
minster are visiting at the  
home of Mr and Mrs R. J.  
Bennett.

The Annual Rally Day services  
were observed throughout the  
district last Sunday, and the pro-  
gram, prepared by the Board of  
Religious Education was followed  
in several Sunday Schools. There  
was an open session of the Mirror  
United Church Sunday School on  
Sunday morning in charge of Mr.  
Olding. The theme of the pro-  
gram was "Peace and Goodwill"  
and suitable recitations were  
given Carl Olson, Ina Conway,  
Matie Laeret and Una Campbell.  
Miss Barbara Walker gave a very  
interesting reading entitled "The  
Christ of the Andes." There was  
religious music with Agnes Whiting  
at the organ. The offering was  
given for a special object, to help  
organize and carry on Sunday  
School work in new and needy  
districts.

Rally Day services were held at  
the Ripley Sunday School last  
Sunday. Mrs Roper being in  
charge. The special program was  
ably rendered by the members of  
the Sunday School, and Roy  
Barritt, Ruby Dye, May Mann  
and Fred Bell gave suitable recit-  
ations for the occasion. Miss  
McKeehan very effectively told  
the story of "The Christ of the  
Andes." There was special Rally  
Day music with Miss Marjorie  
Mann presiding at the organ. A  
generous collection was received  
for the special fund.
